LS-25-I2 ISA Card Multi-Band Receiver

Data Sheet

Description:

The Lumistar LS-25-I2 Receiver is the next generation tri-band, single-slot, full-length ISA FM Receiver. The receiver is manufactured with one, two, or three frequency bands. This wideband design supports PCM data rates up to 20 Mbps and includes both an FM demodulated output for PCM data, filtered AM and linear AGC outputs. The design offers up to 12 IF Bandwidths and 12 Video Filters. AC coupling with a low frequency filter is employed to ensure a high quality data

link with long strings of NRZ-L ones or zeroes. Down-converter versions of this design are available (LS-25-D2 Multi-band Downconverter, LS-27-D Dual-Band Two Channel, or LS-27-Q Quad-Band Single Channel) to be used with the LS-33-P Digital

Diversity Combiner providing two or three-board solutions to Pre-Detection Diversity Reception. The 20 MHz Reference I/O allows the local oscillators of two receivers to be locked together to achieve the high performance required in Pre-Detection Diversity Combining.

Key Features:
